

STEREO MOC Status Report
Time Period: 2008:175 - 2008:181

STEREO Ahead (STA) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Ahead spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On day 178, a SECCHI stepped calibration at perhelion was executed.
- The average daily SSR playback volume for Ahead was 7.4 Gbits during this week.

STEREO Behind (STB) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Behind spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On day 177, another SECCHI stepped calibration was conducted since insufficient data was collected from the execution on day 141.
- The average daily SSR playback volume for Behind was 7.6 Gbits during this week.
